

# Plastic-Free Paper Cups

100% Paper | Plastic-Free | Fluoride-Free | Sealable | Compostable

Do not contain any conventional plastic materials or PLA. They are manufactured under patented technology and can be used for both cold and hot drinks.

After being used, they can be recycled as paper. Though there is no plastic layer lined, they could still be sealed by our cup sealers, working with our sealing films. Our plastic-free paper cups come in multiple sizes for your choice, and we could also help you to print your logo to bring out the best marketing effect for your business.

We believe that this is the best solution to replace the conventional plastic cups, ordinary plastic-layered paper cups, styrofoam cups, and plastic lids!

- Material: Plastic-Free & Fluoride-Free Paper Pulp
- Shelf life: 2 years
- Heat-Resistant at  $90^{\circ}\text{C} \pm 5^{\circ}\text{C}$
- For Hot & Cold drinks
- Custom print available
